ENGINEER'S REPORT
REGARDING WASTEWATER ISSUES
May 1, 2019

General

– Annual Television Inspection

- Based on our review of the videos, there is approximately 10 to 12 manholes that have some level of defect that is either allowing groundwater to enter the system or compromising the integrity of the structure. In all cases the repairs can be completed from the interior of the manhole. It would be prudent to complete this work in the summer months when the flows are at a minimum. The overall cost of this work is anticipated to be under the current public bidding threshold of \$20,600.

East Side Sewer District

– WWTP – Replacement of Existing Flow Control Box in E/Q Tank

- The contractor is continuing to work on the installation of the box. Once all work that is able to be completed without interrupting the process is finished, an appropriate date will be scheduled to bypass the tank so the remainder of the work can be completed.

– WWTP – Painting of Sludge Holding Tank

- The project has been advertised. Bids are due May 9th, 2019. We anticipate having a bid tabulation and recommendation for the Board's consideration at the May 15th meeting. To date, there has been only a few minor questions.

– Tapping Fee

- Using additional cost information gathered from past projects, we have updated options for the draft tapping fee. Upon review with Township staff, we will finalize the various options for the Board's consideration.
